MAMMALS

Vertebrate fur animals that give birth and generate milk for the calfs.

Classification by reproduction:

Methatheria:

Mammals with often, a pouch, Marsupials. They give birth prematurely and the baby needs to enter the pouch to complete their development, latched onto the teat of its mother.

Ex: koala, kangaroo,wombat

Eutheria:

Mammals that generate a placenta during pregnancy. The calf is born more developed than in Marsupials.

Ex: cows, humans

MAMMALS

Vertebrate fur animals that give birth and generate milk for the calfs.

Classification by taxonomy groups:

*group of living organisms that share certain characteristics and evolutionary ancestry

- **Primates**: gorillas, lemurs
- **Carnivora**: lions, buffalo
- **Rodentia**: mice, hamsters
- **Cetaceans**: dolphins, whales
- **Perissodactyla**: horses, rhynos
- **Artiodactyla**: pigs,cows, deer cattle
- **Proboscidea**: elephants
- **Chiroptera**: bats
- **Monotremata**: echidnas, platypus
